Central Intelligence Agency

Washington, D.C. 20505

DDI 787-82
29 January 1982

MEMORANDUM FOR: Executive Director, Central Intelligence Agency

FROM:

[Redacted]
Special Assistant for Nuclear Proliferation
Intelligence

25X1

SUBJECT: NFIB Review of the Revised Draft of the Memorandum
to Holders of SNIE 6-78, "Likelihood of Attempted
Acquisition of Nuclear Weapons"

1. The subject paper was revised along the lines of your comments and those of the DCI and other NFIB Principals in the course of its review at the 19 January NFIB meeting. You approved the revised draft (the additional material is indicated by a line in the left margin throughout the text) on 26 January, and the DCI reviewed and approved it on 27 January 1982.

2. The revised key judgments have been LDXd to the NFIB representatives and their Principals--the full text was sent to them by courier as soon as we received DCI approval. I have not received any reactions as yet. But given the nature of the comments at the 19 January NFIB meeting and the changes and additions to the draft, I anticipate no substantial problems.
